

Reefer Cargo Handling — one-day course

An opportunity for your staff to gain an understanding of the basic operation of reefer containers, the types of functions and the general refrigerated cargo management operation.

This course will be of interest to people in a range of functions including customer service, marketing, operations and container logistics.

The course will include:

- + How refrigeration works in a container
- + Logistics – the cold supply chain. Stages in the movement of reefer cargo
- + Shipping company procedures before, during and after shipment and delivery
- + Container yard inspection. This will be in the open so suitable clothing should be worn.

Registrations are accepted from members of Shipping Australia at \$200 (plus GST) per person. For registration forms and details of other courses presented by Shipping Australia, check our website www.shippingaustralia.com.au.

In presenting this course, Shipping Australia gratefully acknowledges the valuable assistance of Feliba Pty Ltd, P&O Trans Australia Holdings and Sensitech Inc.
